1. Defects in Silicon

Optical studies of ion-implantation centres in silicon
G. Davies, R. Harding, T. Jin, A. Mainwood and J. Leung-Wong 1

Self-interstitial clusters in silicon
R. Jones, T.A.G. Eberlein, N. Pinho, B.J. Coomer, J.P. Goss, P.R. Briddon and S. Öberg 10

DLTS and PL studies of proton radiation defects in tin-doped FZ silicon
E. Simoen, C. Claeys, V. Privitera, S. Coffa, M. Kokkoris, E. Kossionides, G. Fanourakis, A. Nylandsted Larsen and P. Clauws 19

Structure of tin–vacancy defects in silicon
M. Kaukonen, R. Jones, S. Öberg and P.R. Briddon 24

Time domain measurement of spin-dependent recombination – A novel defect spectroscopy method
C. Boehme, P. Kanschat and K. Lips 30

DLTS and EPR study of defects in H implanted silicon
V. Mikšić, B. Pivac, B. Rakvin, H. Zorc, F. Corni, R. Tonini and G. Ottaviani 36

High resolution Laplace DLTS studies of defects in ion-implanted silicon
J.H. Evans-Freeman, N. Abdelgader, P.Y.Y. Kan and A.R. Peaker 41

Effect of rapid thermal annealing on oxide precipitation behavior in silicon crystal
M. Akatsuka, M. Okui and K. Sueoka 46

^{57}Fe Mössbauer study of radiation damage in ion-implanted Si, SiGe and SiSn
H.P. Gunnlaugsson, M. Fanciulli, M. Dietrich, K. Bharuth-Ram, R. Sielemann, G. Weyer and ISOLDE Collaboration 55

Cobalt silicide formation inside surface defects of a silicon substrate
I. Belousov, A. Grib, S. Linzen and P. Seidel 61

Characterization of hydrophobic bonded silicon wafers
N. Keskitalo, S. Tiensuu and A. Hallén 66

On-line DLTS investigations of the mono- and di-vacancy in p-type silicon after low temperature electron irradiation
N. Zangenberg, J.-J. Goubet and A. Nylandsted Larsen 71

Interaction between point defects in the Si–SiO_2 system during the process of its formation
D. Kropman, T. Kärner, A. Samoson, I. Heinmaa, Ü. Ugaste and E. Mellikov 78

Interactions of primary defects with impurities in silicon
B.N. Mukashev, Kh.A. Abdullin and Yu.V. Gorelkinskii 83

Bulk generation lifetime studies in semiconductor structures with nonuniform distribution of electrically active defects in silicon
V.M. Popov, A.P. Pokanevich and A.I. Panin 88

Positron beam and Raman analysis of hydrogen plasma treated and annealed Cz-Si
H. Schut, A. van Veen, S.W.H. Eijt, R. Job, A.G. Ulyasin and W.R. Fahrner 94

2. Radiation Effects in Silicon

Relation between microscopic defects and macroscopic changes in silicon detector properties after hadron irradiation
M. Moll, E. Fretwurst, M. Kuhnke and G. Lindström 100
New results for a novel oxygenated silicon material
C. Da Via' and S.J. Watts 111
Hydrogen enhanced thermal donor formation in oxygen enriched high resistive float-zone silicon
R. Job, A.G. Ulyashin, W.R. Fahrner, E. Simoen, C. Claeys and G. Tonelli 116
Defect engineering in Czochralski silicon by electron irradiation at different temperatures
J.L. Lindström, L.I. Murin, T. Hallberg, V.P. Markevich, B.G. Svensson, M. Kleverman and J. Hermansson 121
Computer image analysis of shrinkage of isolated amorphous zones in semiconductors induced by electron beam
I. Jenčić, J. Skvarč, E.P. Hollar and I.M. Robertson 126
Formation of luminescent structures on Cz-silicon by hydrogen plasma treatments and oxidation
R. Job, A.G. Ulyashin and W.R. Fahrner 132
Cryogenic investigations and modelling of inter-defect charge exchange in silicon particle detectors
B.C. MacEvoy, G. Hall and A. Santocchia 138
Defect generation in crystalline silicon irradiated with high energy particles
M. Kuhnke, E. Fretwurst and G. Lindstroem 144
Formation of electrically active defects in neutron irradiated silicon
P. Kaminski, R. Kozlowski and E. Nossarzewska-Orlowska 152
Carrier lifetime and turn-off current control by electron irradiation of MCT
E.V. Chernyavsky, V.P. Popov, Yu.I. Krasnikov and L.N. Safronov 157
Reversible and irreversible reaction fronts in two competing reactions system
M. Sinder, H. Taitelbaum and J. Pelleg 161
Impact of fast-neutron irradiation on the silicon p–n junction leakage and role of the diffusion reverse current
A. Czerwinski, J. Kątcki, J. Ratajczak, E. Simoen, A. Poyai, C. Claeys and H. Ohyama 166
An enhanced approach to numerical modeling of heavily irradiated silicon devices
F. Moscatelli, A. Santocchia, D. Passeri, G.M. Bilei, B.C. MacEvoy, G. Hall and P. Placidi 171
Radiation damage of polycrystalline silicon films
H. Ohyama, M. Nakabayashi, E. Simoen, C. Claeys, K. Tanaka and K. Kobayashi 176
EPR studies of neutron-irradiated n-type FZ silicon doped with tin
G. Mitrikas, G. Kordas, G. Fanourakis and E. Simoen 181

3. SiC, SiGe, GaAs

Ion implantation of silicon carbide
A. Hallén, M.S. Janson, A.Yu. Kuznetsov, D. Åberg, M.K. Linnarsson, B.G. Svensson, P.O. Persson, F.H.C. Carlsson, L. Storasta, J.P. Bergman, S.G. Sridhara and Y. Zhang 186
The di-vacancy in particle-irradiated, strain-relaxed SiGe
H. av Skardi, A. Bro Hansen, A. Mesli and A. Nylandsted Larsen 195
Electron paramagnetic resonance study of proton implantation induced defects in monocrystalline 4H- and 6H-SiC
H.J. von Bardeleben and J.L. Cantin 201
Formation and annealing of periodically arranged amorphous SiC_x nanoclusters in silicon
J.K.N. Lindner, M. Häberlen, M. Schmid, W. Attenberger and B. Stritzker 206
Diffusion and clustering of supersaturated carbon in SiGeC layers under oxidation
E. Napolitani, D. De Salvador, A. Coati, M. Berti, A.V. Drigo, M.S. Carroll, J.C. Sturm, J. Stangl, G. Bauer and C. Spinella 212

Defects induced by high energy helium implantation in 4H–SiC
M.F. Beaufort, E. Oliviero, M.L. David, J. Nomgaudyte, L. Pranevicius, A. Declémy and J.F. Barbot 218
Helium implantation defects in SiC studied by thermal helium desorption spectrometry
E. Oliviero, A. van Veen, A.V. Fedorov, M.F. Beaufort and J.F. Barbot 223
Defect engineering in III–V ternary alloys: Effects of strain and local charge on the formation of native deep defects
A. Amore Bonapasta and P. Giannozzi 229
Photo-dissociation of hydrogen passivated dopants in gallium arsenide
L. Tong, J.A. Larsson, M. Nolan, M. Murtagh, J.C. Greer, M. Barbe, F. Bailly, J. Chevallier, F.S. Silvestre, D. Loridant-Bernard, E. Constant and F.M. Constant 234
Distribution of defects and impurities in gallium arsenide wafers after surface gettering
A.T. Gorelenok, V.F. Andrievskii, A.V. Kamanin, S.I. Kohanovskii and N.M. Shmidt 240

4. Ion Implantation and Diffusion

Issues on boron electrical activation in silicon: Experiments on boron clusters and shallow junctions formation
G. Mannino, V. Privitera, S. Solmi and N.E.B. Cowern 246
Current status of models for transient phenomena in dopant diffusion and activation
P. Pichler and D. Stiebel 256
Room temperature defect diffusion in ion implanted c-Si
S. Libertino, S. Coffa and A. La Magna 265
Dopant behaviour and damage annealing in silicon implanted with 1 keV arsenic
S. Whelan, V. Privitera, G. Mannino, M. Italia, C. Bongiorno, E. Napolitani, E.J.H. Collart and J.A. van den Berg 271
Effect of the Ge preamorphization dose on boron diffusion and defect evolution in silicon
B. Colombeau, F. Cristiano, F. Olivie, C. Amand, G. Ben Assayag and A. Claverie 276
Modeling of the Ostwald ripening of extrinsic defects and transient enhanced diffusion in silicon
A. Claverie, B. Colombeau, F. Cristiano, A. Altibelli and C. Bonafos 281
Flash lamp annealing with millisecond pulses for ultra-shallow boron profiles in silicon
T. Gebel, M. Voelskow, W. Skorupa, G. Mannino, V. Privitera, F. Priolo, E. Napolitani and A. Carnera 287
Engineering the diffusion behavior of dopants (B, Sb) in silicon by incorporation of carbon
P. Lavéant, P. Werner, N. Engler and U. Gösele 292
Prevention of impurity gettering in the $R_p/2$ region of ion-implanted silicon by defect engineering
R. Kögler, A. Peeva, J. Kaschny, W. Skorupa and H. Hutter 298
TCAD calibration of USJ profiles for advanced deep sub-μm CMOS processes
C. Zechner, D. Matveev, A. Erlebach, S. Simeonov, V. Menialenko, R. Mickevicius, M. Foad, A. Al-Bayati, A. Lebedev and M. Posselt 303
Generation of defects induced by MeV proton implantation in silicon – Influence of nuclear losses
M.-L. David, E. Oliviero, C. Blanchard and J.F. Barbot 309
Effect of nitrogen segregation on TED and loss of phosphorus in CZ-Si
N. Fujiwara, K. Saito, Y. Nakabayashi, H.I. Osuman, K. Toyonaga, S. Matsumoto and Y. Sato 313
An IR-reflectivity and X-ray diffraction study of high energy He-ion implantation-induced damage in 4H–SiC
A. Declémy, E. Oliviero, M.F. Beaufort, J.F. Barbot, M.L. David, C. Blanchard, Y. Tessier and E. Ntsoenzok 318
Anormal growth of cavities in MeV He implanted Si covered with a thin Al foil
R. Delamare, E. Ntsoenzok, F. Labohm, A. van Veen, J. Grisolia and A. Claverie 324
Raman and photoluminescence investigations of the H^+ ion implanted silicon-on-insulator structure formed by hydrogen ion cut
I.E. Tyschenko, A.B. Talochkin, B.A. Kolesov, K.S. Zhuravlev, V.I. Obodnikov and V.P. Popov 329
Separation of vacancy and interstitial depth profiles in proton- and boron-implanted silicon
P. Pellegrino, P. Lévêque, H. Kortegaard-Nielsen, A. Hallén, J. Wong-Leung, C. Jagadish and B.G. Svensson 334

A kinetic lattice Monte-Carlo approach to the evolution of boron in silicon
M. Strobel, A. La Magna and S. Coffa 339
Defect distributions in silicon implanted with low doses of MeV ions
A. Hallén and N. Keskitalo 344
Some aspects of blistering and exfoliation of helium–hydrogen coimplanted (1 0 0) silicon
F. Corni and R. Tonini 349
Defects in carbon and oxygen implanted p-type silicon
B. Pivac, I. Kovačević and V. Borjanović 355
Influence of fluorine on the simulation of the transient enhanced diffusion of 15 keV BF_2^+ ion implantation into silicon
A. Dusch, J. Marcon, K. Masmoudi, K. Ketata, F. Olivié, M. Benhzora and M. Ketata 360
Non-equilibrium impurity redistribution in Si
A.N. Buzynin, A.E. Luk'yanov, V.V. Osiko and V.V. Voronkov 366
Co-implantation of hydrogen and helium for thermal stabilization of lifetime in power devices
E. Ntsoenzok and G. Blondiaux 371
Dose-rate influence on the defect production in MeV proton-implanted float-zone and epitaxial n-type silicon
P. Lévêque, A. Hallén, P. Pellegrino, B.G. Svensson and V. Privitera 375

5. Silicon Devices

Future technology for advanced MOS devices
C. Wyon 380
Radiation damage in flash memory cells
C. Claeys, H. Ohyama, E. Simoen, M. Nakabayashi and K. Kobayashi 392
Ultra-shallow junction formation by excimer laser annealing and low energy (<1 keV) B implantation: A two-dimensional analysis
G. Fortunato, L. Mariucci, M. Stanizzi, V. Privitera, S. Whelan, C. Spinella, G. Mannino, M. Italia, C. Bongiorno and A. Mittiga 401
Radiation effects on the current–voltage and capacitance–voltage characteristics of advanced p–n junction diodes surrounded by shallow trench isolation
A. Poyai, E. Simoen, C. Claeys, K. Hayama, K. Kobayashi and H. Ohyama 409
Optimum lifetime structuring in silicon power diodes by means of various irradiation techniques
P. Hazdra, J. Vobecký and K. Brand 414
Radiation effect on n-MOSFETs fabricated in a BiCMOS process
H. Ohyama, E. Simoen, C. Claeys, M. Nakabayashi, K. Hayama, A. Ueda, K. Kobayashi and Y. Takami 419
Defect assessment of irradiated STI diodes
H. Ohyama, K. Hayama, T. Miura, E. Simoen, C. Claeys, A. Poyai, M. Nakabayashi and K. Kobayashi 424
γ-irradiation hardness of short-channel nMOSFETs fabricated in a 0.5 μm SOI technology
C. Claeys, E. Simoen, A. Efremov, V.G. Litovchenko, A. Evtukh, A. Kizjak and Ju. Rassamakin 429
Time domain and frequency analysis of RTS noise in deep submicron SiGe HBTs
J. Raoult, L. Militaru, J. Verdier and A. Souifi 435
Porous silicon-based passivation and gettering in polycrystalline silicon solar cells
W. Dimassi, M. Bouaïcha, M. Saâdoun, B. Bessaïs, H. Ezzaouia and R. Bennaceur 441

Author index 446
